Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record neither teaches or suggests a method of treating a target, in patients body, with a radiating apparatus as claimed comprised of a radiating apparatus in combination with a scanner, to provide positional information of the target with respect to a known treatment volume, and a controller such that the controller automatically activates said radiating apparatus when the target is at least partially coincident with the known treatment volume and deactivates said radiating apparatus when the target is not at least partially coincident with the known treatment volume. The prior art does not show a controller that bases the decision to activate and deactivate the radiating apparatus on information from the scanner that monitors the position of the target within a patients body relative to said known treatment volume.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nonaka, Turpin, Hasegawa, Kito and Kaufman are cited to show structure of methods similar to the claimed invention.
